*Do you really need a left
lever to enjoy riding?*

The Dual Clutch Transmission made its worldwide debuts for motorbikes in 2010 with the Honda VFR 1200. Now entering its 3rd generation and downsized to suit mid-displacement bikes, the DCT is completely different from the belt-type transmissions used by most scooters: it is structurally a conventional 6-speed gear ratio transmission, yet electronically controlled when changing speeds. Keep the fun of a manual transmission; enjoy the comfort of an automatic one!

LUGGAGE

48L Top Box (*)
08L48-MKA-RTB, RTBA, C, E or G

48L Top Box with backrest, delivered with every components needed for mounting (plate, rear carrier) or to lock it with using the bike key.
