What's not to love with the V4?

The love story between Honda and the V4 4-Stroke DOHC engines started 40 years ago. Designed to challenge the 2 strokes dominating the Road Racing World Championship, the NR500 started the lineage of Honda bikes sharing the DNA rooted in the Crossrunner: the unique flexibility, smoothness and purity of output provided by a V4 engine.

The first Honda V4 engine developed in 1978 for the Road Racing World Championship
