REBEL 1100

**NEW
MODEL**

Do you really need a clutch lever?

The Dual Clutch Transmission made its worldwide debuts for motorbikes in 2010 with the Honda VFR 1200. It has been constantly improved since then. DCT allows the rider to focus on accelerating, turning and braking, rather than gear shifting.

This increases confidence and control for the rider.

The DCT is completely different from the automatic transmission used by most scooters: it is structurally a conventional 6-speed transmission electronically controlled.
