Now the Hornet buzzes back...

HORNET CB500

Is reliability supposed to be boring?

It's not rare to find CB500 proudly boasting more than 300,000 kms (more than 186,000 miles), but the long-time favourite of the couriers and the driving school is much more than a workhorse. Started in France in 1996, the CB500 Cup spread across Europe quickly and helped young talents such as Sebastien Charpentier or James Toseland to make a name by themselves, on a budget.

The bike that changed everything

After 5 consecutive titles in the World Grand Prix Road Racing Series, Honda decided to withdraw and turn toward its primary target: transfer the technology obtained in competition to develop high-performance consumer machines. After a first attempt with a 450cc, Honda released the CB750 Four in January 1969. The initial production forecast of 1,500 units a year became soon a monthly figure and then jumped to 3,000 units/month. By pushing the boundaries of performance, reliability and easy handling in motorcycles, Honda created a new class of Superbikes. The CB1000R is the modern expression of the same spirit that guides Honda engineers since decades.

The Dream CB750 FOUR, which hit the market in July 1969

CB650R

Where are these beautiful curves coming from?

One of the most distinctive attributes of the CB650R is its swooping four-into-one exhaust system. This beautiful design is a tribute to another iconic Honda: the CB400F also known as the CB 400 Four. Produced between 1975 and 1977, the CB 400 Four caused quite a stir thanks to its café racer look. Delivering only 37 bhp (28 kW) at 8,500 rpm and 24 lb-ft (33 N·m) at 7,500 rpm, its four-in-line engine was not meant to take the racetracks by storm. Yet, back in the late 70', some versions upgraded to 492cc were capable of 13,500 rpm and producing an estimated 60 bhp (45 kW).

REBEL 1100

Do you really need a clutch lever?

The Dual Clutch Transmission made its worldwide debuts for motorbikes in 2010 with the Honda VFR 1200. It has been constantly improved since then. DCT allows the rider to focus on accelerating, turning and braking, rather than gear shifting. This increases confidence and control for the rider. The DCT is completely different from the automatic transmission used by most scooters: it is structurally a conventional 6-speed transmission electronically controlled.

REBEL 500

From one Rebel to another?

Since 2013, The Bike Shed London is a motorcycle exhibition like no other celebrating the creative culture around the custom bike scene. It is there that Keita Mikura, the Rebel's Project Leader, was inspired to create a new kind of machine for young riders, leaving free space for further customization.

In 2017, the Rebel concept became reality and reached another level, thanks to the vision and the craftsmanship of 2 Brits: Dan Gold, a tattoo artist and Russ Brown, a custom bike builder.

Street Scrambler

Honda has a long history of getting smaller capacity bikes just right for riders around the world. A combination of easy usability, useful engine performance, affordability and distinct individuality equal motorcycles that, over time, come to mean so much to their owners.

The 1962 twin-cylinder CL72 was one such bike. One of the first true 'street scramblers' it was raced, ridden and enjoyed for years. It proved that a lightweight bike with off-road dynamics was great fun around town and, latterly, the high-barred, high-piped style has become an iconic signature for many 21st century riders.
