Africa Twin

ACCESSORIES CRF1100L AFRICA TWIN

AFRICA TWIN REACHES NEW HEIGHTS

In 2017, the Africa Twin broke the record for the highest altitude reached by a twin-cylinder motorcycle. After 5 days of acclimatisation, a team of 5 five riders piloted the Africa Twin onto the slopes of the world's highest active volcano, the Nevado Ojos del Salado – located between Argentina and Chile. Reaching 5,965 metres above sea level, the international team completed its ascent within 24 hours with Africa Twin specially equipped with Termignoni exhaust, revised final sprockets, new Metzeler MC360TM tyres and a range of Honda genuine accessories. Their route took them – in temperatures as low as minus 5 degrees Celsius – through broken asphalt, gravel, mud, sand and finally stretches of ice pockets known as 'penitentes', underlining once again the Africa Twin's credentials as the best-performing off-road motorcycle in its class.

ACCESSORIES X-ADV

TOUGHER THAN THE REST!

During the 2019 Gibraltar Race, a 7,000-km all-terrain rally from Baltic Sea to Atlantic Ocean, Renato Zocchi steered an X-ADV to the Class 2 victory. The rider put also himself as seventh overall in the event, beating out the competition of purpose-built dirt bikes and adventure tourers. While his X-ADV was specially prepared with extra wheel travel and ground clearance, Zocchi kept the footboards and drove its DCT version on Gravel mode.

Another proof that no matter where you want to go, the X-ADV is tougher than the rest to get you there!

DO YOU REALLY NEED A LEFT LEVER TO ENJOY RIDING?

The Dual Clutch Transmission made its worldwide debuts for motorbikes in 2010 with the Honda VFR 1200. Now entering its 3rd generation and downsized to suit mid-displacement bikes, the DCT is completely different from the belt-type transmissions used by most scooters: it is structurally a conventional 6-speed gear ratio transmission, yet electronically controlled when changing speeds. Keep the fun of a manual transmission; enjoy the comfort of an automatic one!

GL1800 GOLD WING / GOLD WING TOUR

WHEN LONG-DISTANCE MOTORCYCLING BECAME A REALITY

Honda's Gold Wing is one of the most iconic names in biking history. Revealed back in 1975, the Gold Wing became through the years, a synonym of long-distance motorcycling. The world's longest motorcycle ride, spanning 10 years, 279 countries and a total distance of 457,000 miles (735,000 km) was achieved by an Argentinian rider on a 1980 Honda Gold Wing GL1100.

HORNET
750

ACCESSORIES *Hornet CB750*

REBIRTH OF A LEGEND

High-performance, flexible and fun, the Honda Hornet launched in Europe in 1998 and raced straight to the front of the sports naked field. The undisputed pioneer in its class, the Hornet's popularity was fuelled by the rise of the internet where sports minded Hornet enthusiasts formed loyal communities known as the Swarm. Now the Hornet buzzes back...

CB 650R

NEO SPORTS CAFÉ

ACCESSORIES CB650R

WHERE ARE THESE BEAUTIFUL CURVES COMING FROM?

One of the most distinctive attributes of the CB650R is its swooping four-into-one exhaust system. This beautiful design is a tribute to another iconic Honda: the CB400F also known as the CB 400 Four. Produced between 1975 and 1977, the CB 400 Four caused quite a stir thanks to its café racer look. Delivering only 37 bhp (28 kW) at 8,500 rpm and 24 lb-ft (33 N·m) at 7,500 rpm, its four-in-line engine was not meant to take the racetracks by storm. Yet, back in the late 70', some versions upgraded to 492cc were capable of 13,500 rpm and producing an estimated 60 bhp (45 kW).

ACCESSORIES HORNET CB500

IS RELIABILITY SUPPOSED TO BE BORING?

It's not rare to find CB500 proudly boasting more than 300,000 kms (more than 186,000 miles), but the long-time favourite of the couriers and the driving school is much more than a workhorse. Started in France in 1996, the CB500 Cup spread across Europe quickly and helped young talents such as Sebastien Charpentier or James Toseland to make a name by themselves, on a budget.

DO YOU REALLY NEED A CLUTCH LEVER?

The Dual Clutch Transmission made its worldwide debuts for motorbikes in 2010 with the Honda VFR 1200. It has been constantly improved since then. DCT allows the rider to focus on accelerating, turning and braking, rather than gear shifting. This increases confidence and control for the rider. The DCT is completely different from the automatic transmission used by most scooters: it is structurally a conventional 6-speed transmission electronically controlled.

FROM ONE REBEL TO ANOTHER?

Since 2013, The Bike Shed London is a motorcycle exhibition like no other celebrating the creative culture around the custom bike scene. It is there that Keita Mikura, the Rebel's Project Leader, was inspired to create a new kind of machine for young riders, leaving free space for further customization.

In 2017, the Rebel concept became reality and reached another level, thanks to the vision and the craftsmanship of 2 Brits: Dan Gold, a tattoo artist and Russ Brown, a custom bike builder.

STREET SCRAMBLER

Honda has a long history of getting smaller capacity bikes just right for riders around the world. A combination of easy usability, useful engine performance, affordability and distinct individuality equal motorcycles that, over time, come to mean so much to their owners.

The 1962 twin-cylinder CL72 was one such bike. One of the first true 'street scramblers' it was raced, ridden and enjoyed for years. It proved that a lightweight bike with off-road dynamics was great fun around town and, latterly, the high-barred, high-piped style has become an iconic signature for many 21st century riders.

ACCESSORIES

CBR1000RR-R / CBR1000RR-R SP

The CBR900RR Fireblade that started all.

THE BLADE THAT CHANGED HOW BIKES WERE BUILT.

Aiming to create a high-performance motorcycle that could defeat its own RVF750 in Endurance Road Races, Honda developed an R&D project that led directly to the CBR900RR in 1992. With 128 HP, it was not the most powerful of its time. However, thanks to a dry weight of 185 kg when all rivals were well over 200 kg, the first Fireblade, soon nicknamed "Blade" by the fans, was so easy to control that it seemed to read its rider's mind.

More than 25 years after, the most powerful and nimble Honda bikes keep carrying the Blade legacy.

OIL FILLER CAP

08F72-MKZ-J30

The Oil Filler Cap is expertly crafted from premium-grade aluminum, ensuring superior quality and precision. It features a vibrant red anodized finish that adds a striking visual element, while the laser-etched HRC logo on both sides of the handgrip enhances its aesthetics. The cap's interior is hollowed out to enhance strength and minimize weight. Additionally, the cap includes a wire-lock hole, commonly found on HRC works machines, making it suitable for circuit riding. With its surface treatment of red anodization, the Oil Filler Cap combines style, functionality, and a touch of racing heritage.

REAR SEAT COWL

08F75-MKR-D10ZA / 08F75-MKR-D10ZB

Make your motorcycle a racing machine look-alike, with this stylish Single Seat Cowl that also reduces the weight by 120 grams. Replacing the pillion seat easily, this seat cowl cannot be used in conjunction with the Seat Bag. Space available below enables to install a GPS logger (GPS operation not guaranteed). Available in the following colours:

- 08F75-MKR-D10ZA - RED *R380*
- 08F75-MKR-D10ZB - BLACK *NHB01*

WHEEL STRIPE TRICOLOUR SET

08F70-MKZ-J30ZA

The Wheel Stripes set not only features the iconic Honda Racing logo but also enhances the overall racing aesthetic of the bike's undercarriage. With a single unit, these stripes can be easily installed on the bike, making it a convenient and versatile accessory. Perfect for enthusiasts looking to elevate the racing appearance of their motorcycle, the Wheel Stripes set adds a touch of style and sportiness to the bike's overall design.

PERFORMANCE & MAINTENANCE

QUICK SHIFTER

08U73-MKR-D10

The Quick Shifter communicates the shift pedal operations to the ECU that controls fuel injection quantities, throttle levels and ignition timings. In return, the ECU removes the load from the transmission gear and allows up and down-shifts without operating the clutch. The Quick Shifter auto-blip functionality guarantees smooth and instantaneous down-shifts, contributing to a stress-free experience for both sporty and long-distance riding. For Fireblade RR-R version only.

INDOOR BODY COVER

08M72-MKR-D10

Made of a smooth, stretchable material, the bespoke cut of this black Body Cover fits the Fireblade RR-R perfectly and will protect it from dirt. For indoor use only (not waterproof). CBR branding displayed on both the cover and its storage bag. (Product may differ from the pictures displayed).

PROTECTION

FRAME SLIDERS SETS

08P71-MKR-D10

Incorporating feedback from the RC213V works machine, these Frame Sliders can be mounted to the engine hanger bolts.

Available in black, this set of left and right frame guards do not guarantee the protection of all motorcycle parts should the motorcycle fall over.

SPROCKET PROTECTOR

08P77-MKR-D10

Preventing objects from getting caught in the sprocket, this heavy-duty cover will not impair the bend of the swingarm. Designed to conform to circuit regulations, it also increases the Racing appearance of the Fireblade RR-R.

TANK PAD

08P82-MKR-D10

Shaped to match the curves of the Fireblade RR-R tank, this Pad protects the paint from scratches. Flexible and sporty with its carbon-pattern material, the Tank Pad features the CBR logo and is available in Black.

LUGGAGE

REAR SEAT BAG

08L72-MKR-D10

This Rear Seat Bag has an adjustable capacity of 15 to 22 litres. It features convenient zipped pockets on each side and a carrying handle. A waterproof inside liner and a rain cover protect your personal items from the elements. Replacing the pillion seat, its base with fasteners keep the bag perfectly attached yet easy to remove, without the hassle of straps or tools.

Load capacity: 4kg.

TANK BAG

08L71-MKR-D10

This Tank Bag can be swiftly attached or removed and will remain firmly secured with its fasteners on the front. Its Honda Genuine design perfectly matches the tank shape to provide a 7 litres capacity without impairing the handling of the Fireblade RR-R. Clear pocket on the top with a slit to route a cable if needed. Zipped pockets on each side, carrying handle and rain cover achieve to make this tank bag the ideal luggage for your Fireblade RR-R.

Load capacity: 2kg.

COMFORT

HIGH WIND SCREEN

08R70-MKR-D10ZA / 08R71-MKR-D10ZA

Developed after wind-tunnel and real-life riding sessions, the High Wind Screen combines increased wind protection and improved motorcycle control. Compared to the standard version, the top of the wind screen is 8mm higher and 40mm further forward. Furthermore, as a Genuine Honda design, it is fully WVTA certified. 2 versions available:

- 08R70-MKR-D10ZA: Smoke
- 08R71-MKR-D10ZA: Clear

RIDER SPECIAL SEAT (ALCANTARA)

08R72-MKR-D10

Made of luxury Alcantara material that provides outstanding soft feel and superb breathability, the Rider Special Seat improves the riding comfort. Protected with a water repellent finish, the beautiful matt texture of this seat and the CBR branding increase the premium feel of the Fireblade RR-R.

Available only in Black / Grey with Red stitching.

USB POWER SOCKET

08E72-MKR-D10

Based on a convenient Type-C connector enabling the plug to be inserted in any orientation, this socket determines automatically the optimal charging voltage for connected devices. It comes with a cap preventing dirt or water to enter while not in use. Installation under the pillion seat. Attachment 08E70-MKR-DH0 sold separately.

SUPERSPORT SUPREME

Inline fours are the apex predators of the sportbike world. This is the kind of engine that our World Superbike and Supersport riders race. And if you've ever ridden a bike like our CBR600RR it's easy to see why. The engines are super-responsive and high revving. The handling is scalpel sharp. And our CBR600RR combines all that with the light weight of a 600-class machine—and light weight is the key to all sorts of performance benefits. A rare breed these days, fours like the CBR600RR are a delight for track-day use, and outstanding on twisty back roads.

WHAT DOES HSTC MEANS?

Since 1992 with the ST1100 aka "Pan European" model, Honda equips more and more of its motorcycles with a system called Honda Selectable Torque Control (HSTC). This system monitors constantly the speeds of the front and rear wheels via speed sensors incorporated into the Anti-Lock Braking System (ABS). When the rear wheel begins to rotate significantly faster than the front, the system reduces fuel delivery to the engine and limits rear-wheel slippage. In 2019 with the new CBR650R, Honda applied this technology for the first time to its mid-displacement SuperSport motorcycle. The rider can deactivate it on demand.

The CBR500R Cup.

IS RELIABILITY SUPPOSED TO BE BORING?

It's not rare to find some CB500 proudly boasting more than 300,000 kms (more than 186,000 miles), but the long-time favourite of the couriers and the driving school is much more than a workhorse. Beginning in France in 1996, the CB500 Cup spread across Europe quickly. Since 2014, it is on a CBR500R that young talents try to make a name by themselves, on a budget. Sebastien Charpentier or James Toseland, to name a few, started there.

The specific details of this brochure do not apply to any particular product supplied or offered for sale. Manufacturers reserve the right to vary specifications, including colours, with or without notice at such times in such manner as deemed appropriate. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. Consult your Dealer for details regarding the specifications of any featured product. This publication shall not constitute – under any circumstances whatsoever – an offer by the Company to any individual. All sales are made by the Distributor or Dealer subject to and with the benefit of the standard Conditions of Sale and Warranty provided by the Distributor or Dealer, copies of which may be obtained upon request. While efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specific details with the supplying Dealer, especially if a selection is dependent upon one of the features advertised. Please contact your local dealer for information and specifications. Please note that the fuel consumption figures provided are results obtained by Honda under standardised testing conditions prescribed by WMTC. Tests are conducted on a rolling road using a standard version of the vehicle with only one rider and no additional optional equipment. Actual fuel consumption may vary depending on how you ride, how you maintain your vehicle, weather, road conditions, tyre pressure, installation of accessories, cargo, rider and passenger weight, and other factors. You accept that if you do go ahead and make a purchase or enter into any kind of transaction, whether for payment or not, you did so entirely in reliance on your own skill and judgement and not on that of anyone else.

RIDE WITH STYLE Read the owner's manual thoroughly. Get to know your machine and its capabilities. Concentration assists anticipation. Observe other road users' movements. Brake in plenty of time. Always wear a helmet and quality kit, ride fit and NEVER after drinking alcohol. Good roadcraft and courtesy identify the skilled and stylish rider. Honda endorse the law that all helmet visors must comply with BS 4110. Visors that transmit less than 50% of visible light cannot legally be used on the road.
